**Notes to Summary Annual Financial Statements**

---

**Note 1            Criteria for the Preparation of the Summary Financial Statements**

The following criteria have been applied by management in the preparation of the summary financial statements:

- (a) each financial statement presented is clearly labeled as a summary financial statement;
- (b) that the summary financial statements agrees with and can be recalculated from the related information in the audited financial statements of the organization;
- (c) in view of the purpose of the summary financial statements, contain information necessary, and at an appropriate level of aggregation, so as not to be misleading in the circumstances;
- (d) confirm that the audited financial statements be available for inspection or review by any member at the head office address of the organization during normal business hours.

**Note 2            Basis of Accounting**

These summary financial statements have been prepared in accordance with the significant accounting policies set out below to comply with the financial reporting framework prescribed by the Housing Services Act. This framework requires the financial statements to be prepared in accordance with Canadian accounting standards for Not-for-Profit Organizations subject to the following significant exceptions:

- (a) amortization of capital assets under the authority of the Service Managers includes amortization of land and is equal to the principal repaid on the mortgage rather than on the useful lives of the related assets; specifically for properties funded by the Regional Municipality of Waterloo, in determining principal repaid an accrual must be made for the amount of principal to be repaid on the first day following the Corporation's year-end;
- (b) capital expenditures may be charged to the replacement reserve rather than capitalized and amortized over their estimated useful lives;
- (c) a replacement reserve is appropriated from operations;
- (d) investment income earned on replacement reserve funds is credited directly to the reserve rather than to operations;
- (e) long-term debt secured by land and buildings is not segregated between current and long-term on the statement of financial position;
- (f) unless specifically instructed by the funder to defer a capital grant, government grants received for capital expenditures are credited directly to the replacement reserve rather than recorded as deferred contributions related to capital assets and amortized over the estimated useful life of the related capital asset.
